Buoy Deployment Report

seaiceportal.de

Buoy information

Buoy name: 2023P296
IMEI: 300534063441650
Buoy type: Surface Velocity Profiler (iSVP)
Buoy owner: University of Otago

Deployment information

Date and Time (UTC): 14.11.2023 03:20
Position (Lat/Lon): -77.37395/165.99526
Region: McMurdo Sound, Antarctica
Contact:
Inga Smith (UOO)
Expedition name: Antarctica New Zealand Event K892B-2324 2023
Means of deployment: Helicopter

Snow and ice conditions

Snow depth: 0.01 m
Ice thickness: 1.57 m
Ice freeboard: 0.16 m
Ice types:
Fast Ice
FYI (First Year Ice)

Buoy-specific parameters

Additional information *(comments, weather, topography, ice floe size, etc.)*

No transect, just centre (C) point on target coordinate for sea ice measurements. Snow thickness only measured at C, snow depth very thin here and patchy. No sub-ice platelet layer (SIPL) present at this site. Deployed by Inga Smith (University of Otago), with field assistance from Sean Chua (Australian Antarctic Division) and Pauline Barras (University of Canterbury), with helicopter to site flown by Andrew Hefford (Southern Lakes Helicopters, contracted to Antarctica New Zealand), and with sea ice safety checking and field assistance provided by Glenn Smith (Scott Base/Antarctica New Zealand).
